

INTERN  
PROFILEMOHIT  
BASTE*Why did you decide to apply for an internship with MI?*

The family values, which are evident everywhere. You talk to the operator, the CEO, the plant manager - everyone radiates that positive energy of you being a part of the family. MI is a package of knowledge, experience, family, and fun.

*Who did you work with?*

I worked with a super talented group of people who have mentored us from the beginning and who were always there when we needed them. Just to name a few: David Villasenor (CI manager) and Joshua Jonker (technical service manager).

*How did you add value to MI?*

I think the work I did was really valuable. The work was initiated by my mentors, and I was tasked with coming up with solutions to defect reduction, revenue savings, and customer satisfaction.

*What is the most valuable thing you learned?*

From a non-technical aspect - whatever knowledge you have in your head is one thing, but implementing that knowledge with all the values the company has been following for many years - that is the most important thing I learned.

*What did you enjoy most?*

It's hard to say one thing - talking to the operators, getting to know their experiences, working on interesting and breakthrough projects, and let's not forget the Texas summer! The experience is more than what I expected.

HOMETOWN :

*Mumbai, India*

COLLEGE :

*The University of Texas at Arlington*

MAJOR :

*Industrial Engineering*

STATUS :

*Masters, 2018*

SKILLS :

*Consistency**Planning**Goal-orientated*
